## SOFTWARE ENGINEER

Passionately pursuing a career in the IT field, I am highly motivated to join a team where I can wholeheartedly apply my technical skills and enthusiasm for innovation. Eager to contribute to impactful projects and gain hands-on experience while fostering sustainability, I am committed to making a meaningful impact in the world of technology.

### TECHNICAL SKILLS

Experienced in following programming languages and technologies:

- **Programming Languages:** C, C++, Python, Java
- **Databases:** Oracle 12c, MySQL, MongoDB
- **Tools:** Kubernetes, MS Visual Studio, Git, GitHub, VS Code, Visual Paradigm, MS Project
- **Operating Systems:** Windows, Linux/Unix
- **Cloud:** Microsoft Azure, Amazon Web Services
- **Web Development:** JavaScript, CSS3, HTML5, JSON, Node JS

### EDUCATION

#### **Advanced Diploma in Computer Programming and Analysis**

Seneca College – Markham

September 2023 – Present

### PROJECTS

#### Reporting System

- Created a versatile report generation system. It generates several Java-based Excel reports to track student inquiry logs retrieved from SQL databases. These reports are then automated, stored, and emailed to designated faculty members daily.
- The report generation process is accomplished through a standalone Java code that leverages the JXL library. The necessary data is extracted from MySQL databases, with this data originating from the Salesforce student inquiry tracker.
- The entire process is automated and executed on a Linux server using a Shell script. Email notifications are sent out through Sendmail, and the entire process is scheduled to run at a fixed time each day via the crontab scheduler.

#### Parking reservation system

- Developed a responsive parking reservation system. The system includes a user-friendly website that enables visitors to reserve parking spaces at various tourist destinations.
- Website is built with React hosted on AWS S3. A backend Node, using Express.js. Responsive design using the Tailwind CSS framework, ensuring seamless access from different devices.
- MongoDB is utilized for storing unstructured data, facilitating the storage of diverse specifications for each parking area, such as the number of parking spots available.

- The website includes an admin panel, providing administrators with the capability to add, remove, or modify information regarding tourist destinations, parking areas etc.

## **WORK EXPERIENCE**

### **Associate**

Marshalls & HomeSense | Toronto, ON

September 2024 – January 2025

- Optimized operational workflows, ensuring efficiency and accuracy during peak business hours, similar to software process optimization
- Managed complex tasks independently, demonstrating problem-solving and multitasking skills, akin to managing multiple coding projects or debugging software under tight deadlines
- Mentored and onboarded new team members, fostering a collaborative environment, which mirrors team collaboration in software development projects
- Analyzed performance metrics to improve store efficiency, a transferable skill in evaluating software performance and improving code efficiency

### **Assistant Manager**

BBQ @ Bloor | Toronto, ON

September 2023 - August 2024

- Proficient in reservation coordination with strong telephone etiquette, and clear communication with colleagues and customers.
- A Collaborative team player, ensuring the smooth operation of the restaurant, including training new employees, and handling front desk communication.
- Capable of working efficiently in a fast-paced environment, remaining calm under pressure, and delivering high-quality service with attention to detail.
- Skilled in recording orders, scheduling coordination, and maintaining a friendly and professional attitude.

### **Assistant Manager**

SDC Food Company | Toronto, ON

July 2022 – August 2023

- Coordinated scheduling for large-scale orders, delegating tasks effectively to optimize team productivity and meet deadlines
- Provided tailored customer support by delivering detailed product descriptions and recommendations, enhancing client satisfaction
